

Table of contents

PREFACE	ix
<i>Keynote Lectures</i>	
Challenges in the Interpretation of the DMT in Tailings <i>F. Schnaid & E. Odebrecht</i>	13
Geotechnical Characterization of Copper Tailings at Zelazny Most Site <i>M. Jamiolkowski & A. Masella</i>	25
Some 2015 Updates to the TC16 DMT Report 2001 <i>S. Marchetti</i>	43
<i>Case Studies of Projects</i>	
Driven Pile Setup Testing and the Dilatometer <i>P. J. Bullock</i>	69
Design of Retaining Structures in a Tropical Soil with the Use of the Marchetti Dilatometer <i>R. P. Cunha & A. Reyes</i>	77
Redesign of Shallow Foundations using Dilatometer Tests – More Case Studies after DMT'06 Conference <i>R. Failmezger, P. Till, J. Frizzell & S. Kight</i>	83
Settlements Analysis using the Dilatometer: Embankment over Soft Marine Clay Deposit in Dover, New Hampshire, USA <i>A. Getchell, J. R. Blair, A. J. Santamaria & J. Benoit</i>	93
Practical Use of the Dilatometer Tests – Some Case Studies from Poland <i>T. Godlewski</i>	99
Predicting Settlement and Stability of Wet Coal Ash Impoundments using Dilatometer Tests <i>C. Hardin, R. Failmezger & B. Roth</i>	107
Flat Dilatometer Tests for Verification of Uretek's Resin-Injections <i>R. Niederbtucker, W. Wu & A. Paschetto</i>	113
Using Combination of SPT, DMT and CPT to Estimate Geotechnical Model for a Special Project in Turkey <i>F. Orhun Onal & G. Ozmen</i>	119
The Use of a DMT to Monitor the Stability of the Slopes of a Clay Exploitation Pit in the Boom Clay in Belgium <i>H. Peiffer</i>	127
Early Applications of SDMT in Dubai in Two Main Projects for Natural Artificial Earthfill Silty Sand <i>E. Sharif</i>	135
Evaluation of Geotechnical Parameters of Clay built in Dam Core based on DMT <i>Z. Skutnik & S. Krysiak</i>	145

Long-Term Settlements of an Avalanche Gallery on Loose Soil <i>W. Steiner & M. Schulte</i>	153
Application of SCPTU and SDMT in the Assessment of Settlement of Tailings Deposits Loaded by Trial Embankment <i>W. Tschuschke, W. Swidzinski, S. Gogolik & M. Walczak</i>	159
Application of Modern Ground Investigation Techniques To Characterise Quaternary Sediments in Kempsey, NSW <i>J. Varcoe, K. Nation, K. Nunn & S. Terzaghi</i>	167
 <i>Compaction Control</i>	
Use of SDMT Testing for Measuring Soil Densification by Ground Improvement in Christchurch, New Zealand <i>S. Amoroso, K. M. Rollins, P. Monaco & A. Thorp</i>	177
Vibroflotation Control of Sandy Soils using DMT and CPTU <i>L. Balachowsky & N. Kurek</i>	185
CPTU / DMT Control of Heavy Tamping Compaction of Sands <i>N. Kurek & L. Balachowski</i>	191
 <i>Correlations and Comparisons with other Lab or In-Situ Tests</i>	
Combination of SDMT and CPT Results for Effective Analysis of Soil Parameters at a Site near Piacenza, Italy <i>K. Bandyopadhyay, S. Saraswati, S. Bhattacharjee & S. Mitra</i>	199
Perception of Overconsolidates States of Coarse-Grained Soils using DMT Results <i>H. Choo, W. Lee, C. Lee, Y.-S. Kim & M.-J. Lee</i>	205
Geotechnical Characterization for the Magneti Marelli Factory in Crevalcore (Bologna): DMT, CPTu and Lab Tests Comparisons <i>F. Fiorelli, M. Franceschini & R. Carbonella</i>	213
Investigation of Dense Sand Properties in Shallow Depth using CPT and DMT <i>D. Gaydazhiev, I. Puscasu, E. Vaitkunaite & L. B. Ibsen</i>	223
Development of the Soil Classification by Material Index (I_D) <i>I. Guskov & A. Gayduk</i>	231
Peak Friction Angle of Undisturbed Sands using DMT <i>P. Mayne</i>	237
Soil behavior Type using the DMT <i>P. K. Robertson</i>	243
Geotechnical Characterization of Shallow Foundation and Wide Area: the Case Study of Venice Airport (Italy) <i>P. Simonini, M. Schiavo, A. Manganaro & S. Amoroso</i>	251
Governolo (Italy) Experimental Site: In-Situ Test Comparisons and Mutual Conversions <i>G. Togliani, L. Calzolari & A. Menghini</i>	259
Pile Capacity Prediction (Class C): DMT vs CPTU <i>G. Togliani & G. Reuter</i>	271

Detection and Characterization of Liquefiable Layers

- Preliminary Liquefaction Studies for Seismic Microzonation of Avezzano, Italy 285
S. Amoroso, P. Boncio, D. Famiani, S. Hailemikael, M. R. Manuel, G. Milana, P. Monaco, M. Vassallo & G. Vessia
- Liquefaction Evaluation of Aveiro Sands from SCPTU and SDMT Tests 293
S. Amoroso, A. Viana da Fonseca, C. Rodrigues & N. Cruz
- Evaluation of Liquefaction Potential by CPTU and SDMT 301
E. Anamali, L. Dhimitri, N. Shkodrani & D. Ward
- Soil Characterization of Catania Harbour by the Seismic Dilatometer Marchetti Test (SDMT) 309
A. Cavallaro, P. Capilleri & M. Maugeri
- Site Response Analysis and Liquefaction Hazard Evaluation in the Catania Harbour (Italy) 317
A. Ferraro, S. Grasso & M. R. Massimino
- SDMT Based Analysis of the Liquefaction Phenomena Induced by the April 6, 2009 Earthquake at Ponte Rasarolo, L'Aquila (Italy) 325
P. Monaco, G. Totani & S. Amoroso
- Comparison of SPT and DMT/SDMT for Liquefaction Potential Analysis of Soft Alluvial Soil at British Embassy in Yangon, Myanmar 333
T. Sein
- SDMT Based Site Characterization and Liquefaction Analysis of Canal Banks Damaged by the 2012 Emilia (Italy) Seismic Sequence 341
L. Tonni, G. Gottardi, M. Marchi, L. Martelli, P. Monaco, L. Simeoni & S. Amoroso
- Comparison of DMT, CPT, SPT and Vs Based Liquefaction Assessment on Treasure Island during the Loma Prieta Earthquake 349
K. Rollins, S. Amoroso & R. Hryciw

New Testing Development (Seismic and Other Instrumentation)

- Comparison of Soil Test Data, Obtained with Different Probes 359
G. Boldyrev, I. Guskov, S. Lavrov, V. Sidorchuk & D. Skopintsev
- A 400-ft (122 m) Deep Dilatometer Sounding in Atlantic Coastal Plain Soils 363
N. Massoudi, R. Failmezger & J. A. Padgett
- Testing of the Soil Deformation Properties In-Situ by Flat Wedge Dilatometer 371
L. V. Nuzhdin, S. Lavrov & M. Nuzhdin
- Instrumented DMT: Review and Analysis 377
H. Shen, W. Haegeman & H. Peiffer

Theoretical and Numerical Evaluations of the DMT

- Analysis of Dilatometer Test in Clay 385
L. Cao, M.-F. Chang & C. Ing Teh
- Soil Stiffness Constitutive Model Parameters for Geotechnical Problems: a Dilatometer Testing Approach 393
C. Cox & P. Mayne
- Estimation of Lateral Earth Pressure on Cantilever Sheet Pile using Flat Dilatometer Test 401

(DMT) Data: Numerical Study <i>K. Deb & S. Konai</i>	
Evaluation of DMT and CPT Parameters to be Used in Numerical Modeling of Piles <i>J. R. Garcia & P. J. Rocha de Albuquerque</i>	409
Some Comments on Dissipation Testing of the Soils <i>E. Imre & L. Bates</i>	415
SDMT Testing for the Estimation of In-Situ G Decay Curves in Soft Alluvial and Organic Soils <i>G. Pepe, G. Coen, Q. Napoleoni, A. Pagliaroli, F. Stigliano, M. Mancini, G. Lanzo, S. Silvani, S. Storoni Ridolfi & M. Scarapazzi</i>	423
Application of the MCC Model for the Estimation of Undrained Geotechnical Parameters of Clays from Dilatometer Tests <i>V. Silvestri & C. Tabib</i>	431
DEM Modeling of Insertion and Expansion during Flat Dilatometer Testing <i>T. Xu & J. D. Frost</i>	439

Applications in Difficult Geomaterials

In-Situ Testing of a Cement-Stabilized Metallurgical Residue <i>M. Arroyo, S. Amoroso, M. De Vincenzi & N. Pérez</i>	449
SDMT – a Tool for In-Situ Identification of Collapsible Soils <i>D. Berisavljevic, D. Rakic & N. Susic</i>	457
DMT Tests at Sarapui Soft Clay Deposit: from 1985 to 2012 <i>F. A. B. Danziger, G. M. Faquim Jannuzzi, M. V. Calijuri Mello Vieira Toniazzo & T. Lunne</i>	465
Dilatometer Tests in Sensitive Champlain Sea Clay: Stress History and Shear Strength <i>A.J. Lutenegro</i>	473
Geotechnical Parameters of Loess Soils from CPTU and SDMT <i>Z. Mlynarek, J. Wierzbicki & M. Manka</i>	481
Comparisons of the Cyclic Resistance of Calcareous Sand Deposit from Puerto Rico from Seismic Dilatometer (SDMT) and Seismic Cone Penetration Tests (SCPTU) <i>A.C. Morales-Velez, C. D.P. Baxter, M. A. Pando & L. B. Anderson</i>	489
Use of Dilatometer in Unusual Difficult Soils – a Case Study <i>M. Mulabdic & K. Minazek</i>	497
Seismic DMT Test in a Non-Text Book Type Geomaterial <i>B. P. Rocha, B. A. C. Castro & H. L. Giacheti</i>	505
Re-appraisal of the Dilatometer for In-Situ Assessment of Geotechnical Properties of Swedish Glacio-Marine Clays <i>T. Wood</i>	513

Appendix A: The TC16 DMT Report 2001 **521**

The Flat Dilatometer Test (DMT) in Soil Investigations”. A Report by the ISSMGE Committee TC16. 41 pp. Reprinted in Proc. DMT 2006, Washington D.C. <i>S. Marchetti, P. Monaco, G. Totani & M. Calabrese</i>	523
